

pH and redox electrodes HA405

Low-maintenance combination electrodes for continuous pH and redox measurements, with pre-pressurised gel electrolyte. Suitable for applications in the chemical industry as well as for water and waste water treatment.

- With silver ion barrier
- Also suitable for rough process conditions up to 2.5 bar gauge pressure
- Reference system: Argenthal®;

pH range: 0 ... 14
Temperature: 0 ... 100 °C
Electrolyte: Gel
Diaphragm: Ceramic
Connection plug: S8 plug head
Shaft Ø: 12 mm

Type	Max. pH value	Max. temperature °C	Shaft length mm	PK	Cat. No.
